EDUCATION

Graphic Era Hill University

Bhimtal, Uttarakhand

Bachelor of Technology in Computer Science

Sep 2022 – June 2026

SKILLS

- **Languages:** C, C++, Java, Python, JavaScript.
- **Core Subjects:** Data Structures & Algorithms, OOPs, DBMS, OS, Computer Networks.
- **Tools & Platforms:** Git, GitHub, Docker, VS Code, Jupyter Notebook, Postman.
- **Soft Skills:** Problem Solving, Team Collaboration, Leadership, Public Speaking, Time Management.

PROJECTS:

Automated Number Plate Recognition: Python, OpenCV, EasyOCR, Twilio API

- Built an Automated Number Plate Recognition system which detect and reads number plates.
- Implemented **Haar Cascade Algorithm** for accurate number plate detection from live camera or image feed.
- Used **OCR** to extract and recognize alphanumeric text from detected plates.
- Created a **notification feature** that sends alerts automatically when a registered vehicle is recognized.

Sales Forecasting Using Predictive Analytics: Python, Django, Scikit-learn, Pandas, NumPy

- Designed a machine learning-based system to predict future sales using past data and business trends.
- Applied **Linear Regression and Decision Tree** algorithms to handle both linear and seasonal sales patterns.
- Achieved around **80% prediction accuracy** across various sales scenarios after fine-tuning models.

Multiple Disease Prediction System Using Machine Learning: Python, Django, TensorFlow, Scikit-learn

- Delivered a web-based interface using Django for early disease prediction, enhancing accessibility by 30%.
- Executed preprocessing steps such as normalization, feature engineering, and missing data imputation, enhancing model accuracy by 15%.
- Enabled real-time predictions with **<2 sec latency**, improving user experience.

Customer Churn Prediction System: Python, Django, TensorFlow, Scikit-learn

- Developed a Customer Churn Prediction system to identify customers likely to stop using a company's service.
- Performed **hyperparameter tuning** to enhance the model's performance and achieved around **85% accuracy**.
- Helped in creating strategies to **reduce customer loss** by identifying users at risk and suggesting retention offers.

Certifications

- [Udemy](#) - Comprehensive Machine Learning with Python.
- [AWS Cloud Practitioner Essentials](#) - AWS Skill Builder.
- [Udemy](#) - End-to-End Programming with C, C++.

Extra-Curricular Activities

- **Amazon ML Summer School:** Mentee at Amazon's ML Summer School 2025.
- Actively took part in mock interviews, group discussions, and aptitude sessions.
- Participated in **coding and ML-focused workshops**, gaining practical exposure to real-world applications.
